

Fortune Teller Game

Functionality Plan

JavaScript / jQuery

■ Text Change Delay

Functionality: `setTimeout()`

Description: A function will change the initial screen text to display each box's corresponding color names a few seconds after the page loads.

■ Color / Number Transition

Functionality: Color - `.animate()` / Number - CSS Transitions (Vanilla JS)

Description: Color - The boxes move clockwise around the screen the number of positions that corresponds to the box clicked.

Number - The boxes rotate individually the number of times that corresponds to the number chosen.

■ Fortune Reveal Transition

Functionality: `.animate()`

Description: The last box clicked gets bigger until it fills the screen and the other boxes get smaller simultaneously.

■ Fortune Fade In & Delay

Functionality: `.fadeIn()` & `.delay()`

Description: The fortune will display with delay by fading in shortly after the last box clicked fills the screen.
